

Table 1 The transformation efficiency of different transformation receptors in *Cyclamen persicum*

Transformation receptors	Number of treated transformation receptors	GUS positive rate of transformation receptors (%)	GUS positive rate of regenerated plants (%)
Leaf	50	18.66±2.31	27.25±2.11
Petiole	50	10.66±3.06	6.39±6.25
Callus	50	81.34±1.15	14.63±2.81

Note: GUS positive rate of transformation receptors=GUS positive receptor number/ treated transformation receptor number; GUS positive rate of regenerated plants=GUS positive regenerated plant number/ total regenerated plant number
