

Table 3 Effects of climatic conditions on floral growth parameters among three varieties of Gladiolus

Location	Floral Growth Parameter						
	Days to Spike emergence	Spike length (cm)	Spike diameter (mm)	Number of Florets Spike <sup>-1</sup>	Floret diameter (mm)	Fresh weight of Spike (g)	Dry Weight of Spike (g)
C1	81.8	40.9	6.98	12.75	62.26	39.36	10.23
C2	75.4*	46.3*	8.030*	13.11*	74.04*	50.12*	14.28*

Note: \* Shows superiority of climatic effect on growth, C1=Faisalabad, C2= Rawalakot
