

Table 4 Effect of climatic conditions on corms and cormels growth parameters among three varieties of Gladiolus

Location	Corms and cormels growth parameter			
	Corm weight (g)	Corm Diameter (cm)	Cormel Weight (g)	Number of cormels Clump ⁻¹
C1	50.72	5.03	6.84	26.17
C2	55.62*	5.94*	8.58*	28.76*

Note: * shows superiority of climatic effect on growth, C1=Faisalabad, C2= Rawalakot
