

Table 1 Effects of different cytokinin treatments on somatic embryonic callus induction of *Haworthia cooperivar*

Cytokinin	IAA (mg/L)	No. of explants	Induction ratio (%)	Growth state
0	0	30	0	Non callus develope
6-BA 1.5	0.5	30	66.67±0.6 a	Yellowish-white friable callus with granular structures
ZT 1.5	0.5	30	16.67±7.64 b	Compact green callus
KT 1.5	0.5	30	22.86±12.64 b	Compact green callus

Note: Different lowercase letters indicate significant differences at $p < 0.05$
